

Student Expense Tracker

Track spending smarter with AI-powered natural language processing

The Problem

Money Blindspot

Students lose track of where their money goes — small purchases add up fast and go unnoticed.

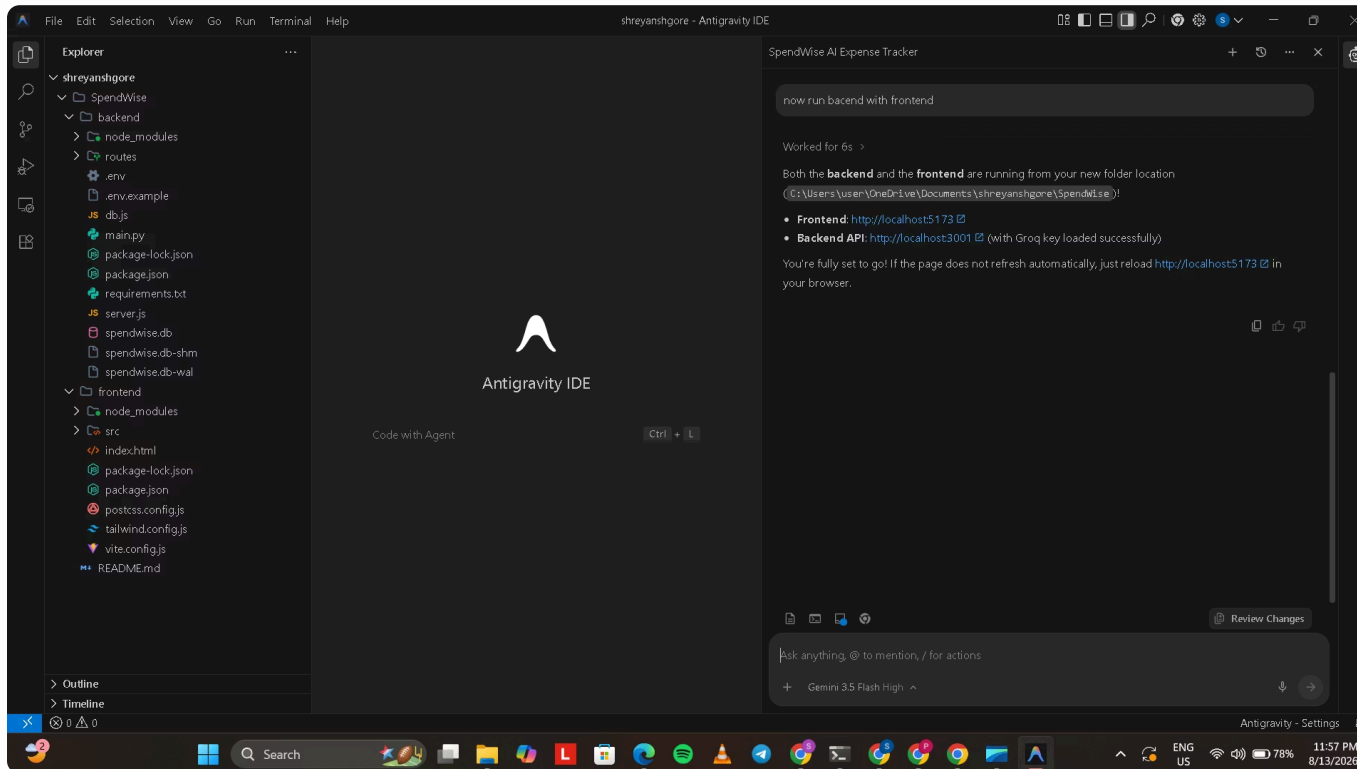

Tedious Logging

Manual expense tracking is tedious and error-prone, so most students simply give up.

No Safety Net

Without real-time budget alerts or spending insights, overspending happens before you realize it.

How It Works: Natural Language Input

Just Type It Naturally

No forms, no dropdowns. Simply type expenses the way you'd say them — **"120 chai and samosa"** — and the app does the rest.

- Forward receipts directly to the app
- Groq API parses text into structured data instantly
- Zero friction means you'll actually stick with it

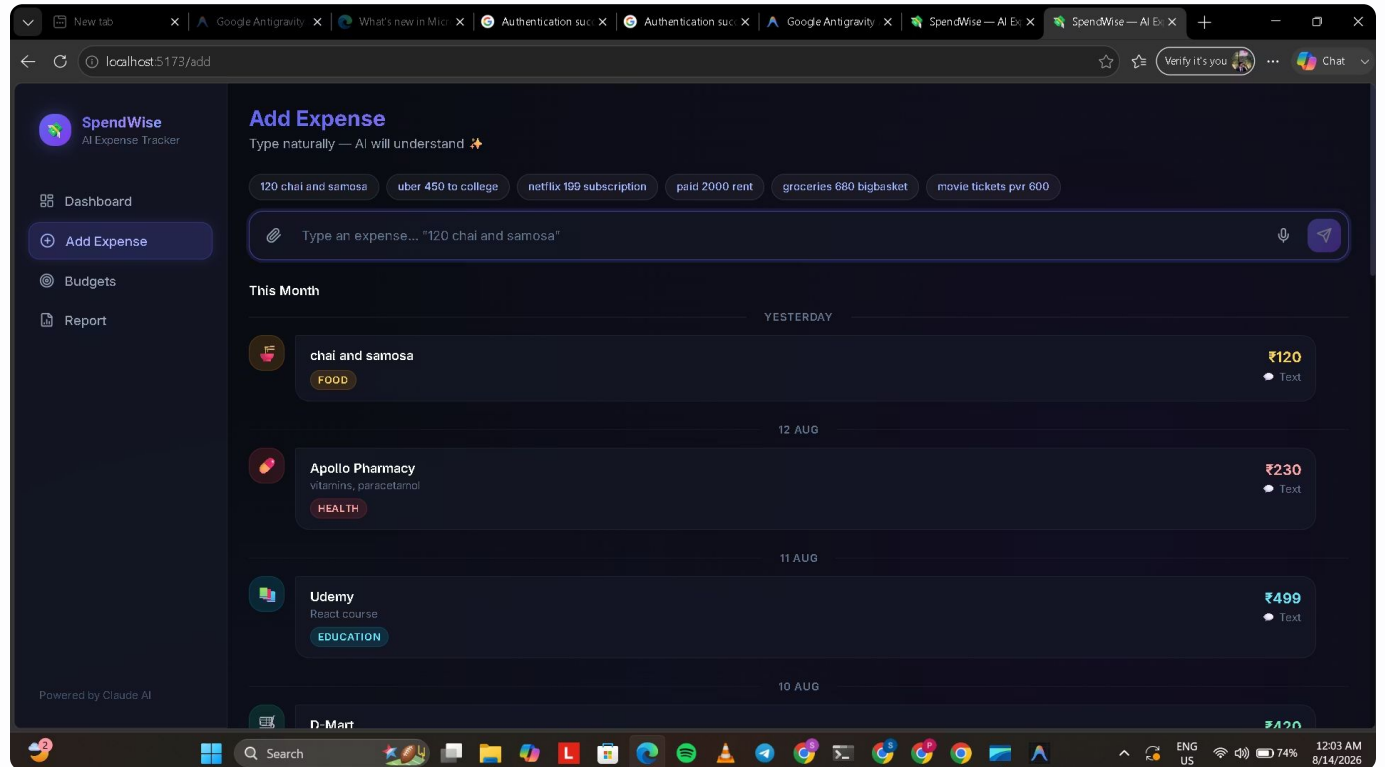

Auto-Categorization

AI Sorts So You Don't Have To

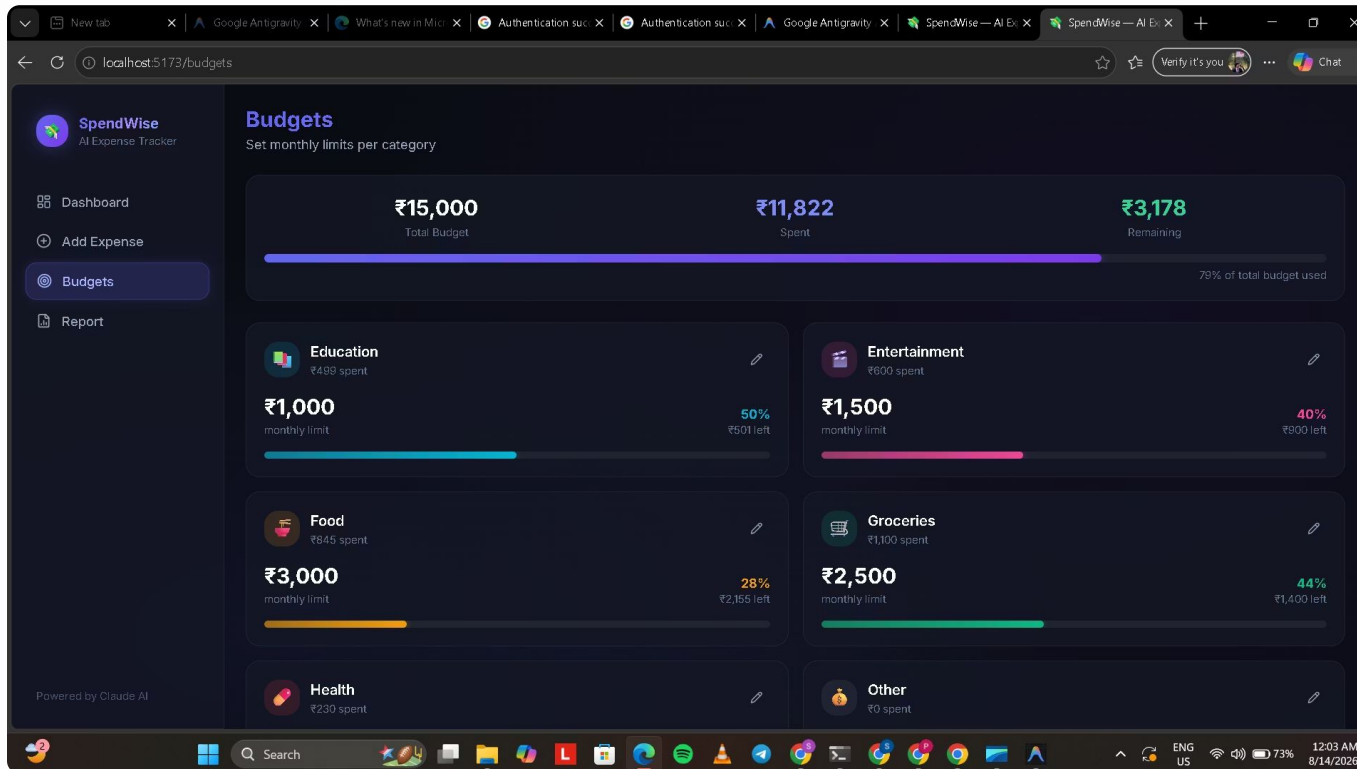

Every expense is automatically tagged into categories like Food, Education, and Entertainment — based on keywords and learned patterns.

- Smart tagging based on keywords and patterns
- Manual override available if needed

📄 No more guessing which bucket a purchase belongs to — the AI handles it instantly.

Budget Management

Set It. Track It. Own It.

Define spending limits for each category — Education, Food, Entertainment, Groceries — and watch real-time progress bars keep you accountable.

- Per-category budget limits you control
- Real-time tracking against your limits
- Visual progress bars: spending vs. budget at a glance

Smart Alerts

Coming soon: planned alerts that will help you stay ahead of your spending once implemented.

Coming Soon: Approaching Limit

Planned notifications to warn you before you hit your budget ceiling.

Coming Soon: Overspend Prevention

Alerts designed to help you adjust early, before overspending becomes a problem.

Coming Soon: Category Warnings

Future category-specific thresholds to show where spending pressure is building.

Dashboard & Analytics

Your Full Financial Picture

The dashboard gives you everything at a glance — no digging required.

- Spending breakdown by category via pie chart
- Daily spending trends visualized as a line graph
- Total spent, remaining budget, and budget status — always visible

Monthly Reports

Full Summary

A comprehensive spending recap of the entire month — every category, every rupee, all in one view.

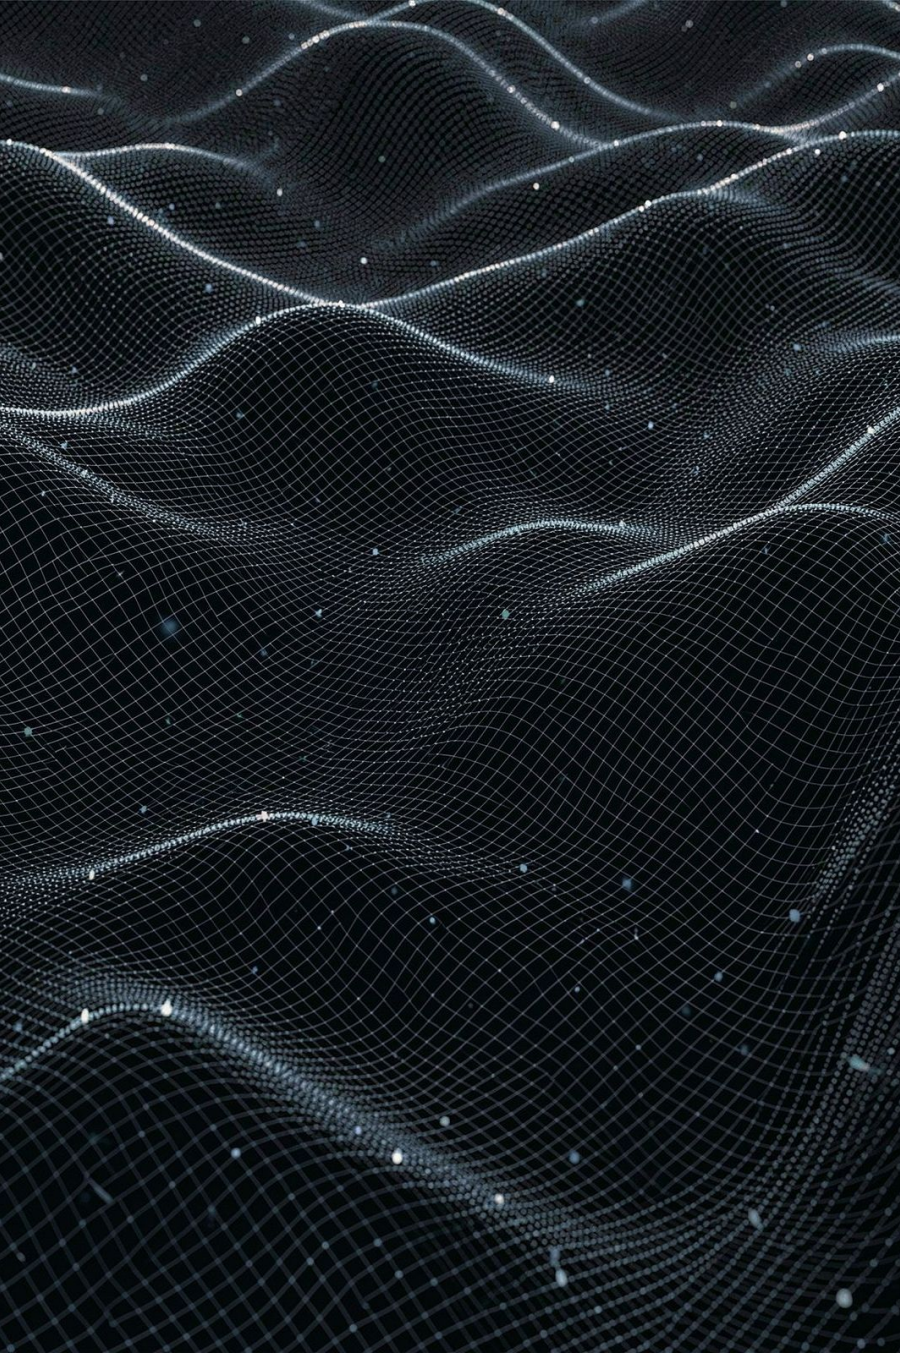

Category Breakdown

See exactly where your money went with category-wise breakdowns and AI-generated insights.

Next-Month Tips

Get personalized recommendations based on your trends to spend smarter next month.

Get Started Today

01

Log in Natural Language

Start typing expenses the way you talk — the Groq API handles all the heavy lifting.

02

Watch Patterns Emerge

In days, your dashboard reveals exactly where your money goes — and how to spend smarter.
